

Bear Lake Trail

Invasive species removal project 2019

Attention Volunteers:

When: Saturday May 18, 2019 from 9AM to Noon (date changed due to weather)

Where: Bear Lake Trail (along Bear Lake Rd between Fenner Rd & Pennsylvania Ave)

What: Removal of invasive plant species; predominantly garlic mustard but could include any identified invasive plant.

Please bring: Gloves, shovels & rakes & bottled water. Wear comfortable/durable work clothes & boots. A limited number of safety/reflective vests are available, but if you have one of your own, please bring it.

For more information, contact Supervisor Kim Arter at 231-744-2454 or karter@laketon.org

Thanks to the Muskegon Conservation District for their expertise & guidance on this project and helping to identify and mark the invasive plants on site. You can also visit www.michigan.gov/invasives to learn more about invasive species and how to identify them.

Pictures below are of some of the invasive plant species you may come across:

Garlic Mustard:

Spotted Knapweed

Purple Loosetrife:

Wild Parsnip:

Himalayan Balsam:
