Re: 2017 MCRC Preservation Program

This letter is being provided to give you information and advance notice of our chip sealing operations taking place this up-coming summer. MCRC has been chip sealing east of Maple Island since June 6th, but soon we will be working in the areas receiving higher traffic volumes. The attached road list is intended for communication purposes and for those people traveling through the affected townships. Changes have been made in this year's schedule to help ensure safe travel and or avoid events in Muskegon County negatively impacted by road preservation.

Due to the amount of equipment and workers on the road during this type of operations; the roads are temporally closed and should be avoided.

Please be aware of the safety of our crew members.

I can be reached at 231-788-7260 with any questions or concerns

Sincerely,

Eric Scott
